## IN THE CLAIMS

Please amend the claims as follows:

Claims 1-17 (Canceled).

transmitted data is to be retransmitted or not,

Claim 18 (New): A communication method having a variable modulation method comprising:

a requesting step of transmitting a signal requesting data transmission from a mobile station to a base station when there is data to be transmitted from the mobile station to the base station;

a notifying step of transmitting a signal notifying the data transmission from the mobile station to the station, when receiving the signal requesting data transmission;

a data transmission step of transmitting the data to be transmitted from the mobile station to the base station when receiving the signal notifying the data transmission; and a retransmission notifying step of transmitting a signal representing whether the

wherein when the signal representing an instruction to retransmit the data is transmitted, the data is retransmitted from the mobile station to the base station with a same modulation method as one used for the data transmission.
